

SUMMARY

Software Engineering student with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Database Management Systems, and Python. Experienced in developing full-stack web applications and RESTful APIs using React.js, Node.js, and MySQL. Skilled in software development, debugging, problem-solving, Git, and collaborative development, with a strong interest in cloud technologies, scalable software systems, and learning new technologies.

SKILLS

Programming Languages: Python, C
Frontend: HTML5, CSS3, JavaScript, React.js
Backend: Node.js
Databases: MySQL, MongoDB
API & Tools: RESTful APIs, JSON, Git, GitHub, Chart.js, Redis
Cloud & Devops: AWS, Jenkins, CI/CD
Machine Learning: Scikit-learn, TensorFlow.js, Pandas, NumPy, Random Forest, Data Preprocessing, Feature Engineering, Model Evaluation, Predictive Modeling

EDUCATION

Rajeev Gandhi Memorial College of Engineering and Technology Bachelor of Technology - Computer Science and Engineering CGPA: 8.68 Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Database Management Systems (DBMS), Computer Networks, AI/ML, Software Engineering	Nandyal, Andhra Pradesh Aug 2023 – Dec 2027
---	---

EXPERIENCE

SmartBridge Virtual Internship React.js, Node.js, MongoDB, HTML, CSS, JavaScript - Developed OrderOnTheGo – Food Ordering Solution, a full-stack web application enabling users to browse 100+ menu items, manage selections, and place food orders through an intuitive interface. - Built reusable React components and backend RESTful APIs with MongoDB for efficient menu and order management, following modular architecture to improve application scalability and maintainability.	Jan 2025 – Jun 2025
---	---------------------

PROJECTS

MediCare – Smart Medicine Reminder & Health Records System HTML, CSS, JavaScript, React.js, Python, Flask, Chart.js, REST APIs - Developed a full-stack healthcare management web application using React.js and Flask, improving medication and appointment management efficiency by 40% through automated reminders and centralized digital health records. - Built RESTful APIs and interactive dashboards using Chart.js to visualize medication history and appointment records, reducing manual record tracking by 50% and simplifying family health record management.	Mar 2026- May 2026
---	--------------------

Tire Wear Prediction System Python, Pandas, NumPy, Scikit-learn, Streamlit, Joblib, Pickle, Flask, REST API - Developed a machine learning-based tire wear prediction system by implementing data preprocessing, feature engineering, and model training, reducing manual analysis time by 60%. - Built an interactive Streamlit dashboard and integrated trained models using Joblib to deliver real-time tire wear predictions with 90% prediction accuracy, improving prediction speed and usability.	Jan 2024-Mar 2024
--	-------------------

GreenPulse – User-Based Energy Usage Recommendation System HTML, CSS, JavaScript, Python, Random Forest, Redis, REST API - Developed a real-time energy monitoring web application using Flask and Redis, improving energy usage tracking efficiency by 50% through live dashboards and automated data processing. - Implemented a Random Forest prediction model and REST APIs to forecast electricity consumption with 90% prediction accuracy, delivering personalized energy-saving recommendations.	Jun 2025-Aug 2025
--	-------------------

CERTIFICATES /ACHIEVEMENTS

- AWS Certified Cloud Practitioner – Amazon Web Services (AWS) - Oracle Cloud infrastructure Certified Generative AI Professional - Participated in multiple hackathons, solving real-world problems through teamwork and technical skills.	Mar 2025 Oct 2025
---	----------------------
